EXPERIMENT 04

VEHICLE SERVICEREQUESTMANAGEMENT SYSTEM

Experiment 4 | Data Modelling and Form Design using Zoho Creator

NAME:SUHRITHASRI | DEPARTMENT:CSBS | ROLL NO.: 241401110

AIM

Todesign a Vehicle Service Request Management application in Zoho Creator using the thirteen Basic Fields available in Form Builder, so an automobile service centre can capture customer details, vehicle information, service preferences, and repair requests in a structured manner.

PROCEDURE

1. Create a new application in Zoho Creator titled “Vehicle Service Request Management System”.
2. Add a form named Service_Request_Form to collect customer and vehicle service information.
3. Use the Basic Fields palette to add Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select, and Checkbox fields.
4. Configure the fields with clear labels: Owner_Name, Email_Address, Pickup_Address, Contact_Number, Vehicle_Registration_Number, Issue_Description, Odometer_Reading, Preferred_Service_Date, Preferred_Dropoff_Time, Vehicle_Type, Service_Type, Additional_Services_Requested, and Authorize_Estimate_And_Repair.
5. Set appropriate field properties and validations, including mandatory inputs, valid email format, phone number format, positive odometer values, and date restrictions.
6. Review the application Data Model to confirm that service request details are stored in the Service_Request form and displayed in the linked report.
7. Save the form, publish the application, and enter a sample service request through the live preview.
8. Open the Service_Request_Form report and verify that submitted customer, vehicle, issue, and scheduling details appear correctly.

RESULT

The Vehicle Service Request Management System form was designed in Zoho Creator using all thirteen Basic Fields. It captures customer contact details, vehicle identification, service requirements, issue descriptions, and preferred scheduling information. Configured validations help maintain data quality, while the report view allows service requests to be reviewed and helps the service centre plan appointments and technician assignments.
