FINAL REPORT FORMAT

CONCLUSION

Thus, the **Vehicle Service Request Form** was successfully created using Zoho Creator's Basic Fields.
All 13 Basic Field types were implemented appropriately to capture customer, vehicle, service, and scheduling details.
Mandatory fields and validation rules were configured to ensure accurate and reliable data entry.
The **Service_Request_Report** was generated to store and manage submitted service requests efficiently.
Hence, the application demonstrates how Zoho Creator can be used to simplify and automate vehicle service request management.
